Zoppas Industries Hangzhou Ltd

ZOPPAS INDUSTRIES Partner

- Experience Zoppas Industries increasing efficiency using lean enterprise across all facilities and departments.
- Access our state-of-the-art laboratory facilities with over 30 years' design experience.
- Benefit from Zoppas Industries manufacturing and design facilities which maintain Quality Management Systems according to ISO 9001, EN 9100 and Environmental Management System according to ISO 14001.
- Access one of the widest Heating Element Technology product portfolios in the world including completely integrated thermal assemblies with sensors, connectors, enclosures, etc.
- Benefit from Zoppas Industries global presence through design and manufacturing facilities across Europe, North America, South America and Asia - lowering your Total Cost of Ownership (TCO) including reduced logistics, design, communication and support costs.
- Access Zoppas Industries' in-house design, development and R&D capabilities, such as CAD 3D design, FEA, DOE, FMEA.
- Benefit from Zoppas Industries products third-party certification, such as UL and VDE: marking applied on customer's request.

We at ZOPPAS INDUSTRIES put you in the front seat of globalization - sourcing your local needs globally.

Compliance with the mark of each specific product must be properly reviewed with our Sales Department.

PLASTICS

We apply our many years' specific experience and the multifunctional skills of the Zoppas Industries group to designing and manufacturing heating elements for the plastics industry. We supply one of the fullest ranges of heating elements and functional units for injection, extrusion and blowing machines, moulds and peripherals. Our products comply with the main international certifications and standards. Customers can take advantage

of our highly qualified worldwide consultancy and design services. We cooperate globally in designing for machine and component manufacturers in the plastics industry and indicate the most appropriate heating technologies for their applications and specific technical and commercial needs. Our engineers work with the most advanced CAD 3D software to facilitate planning interaction and data exchange with customers.
